

ERGOWOOD®

Ergonomic Modular Platform Flooring

ERGOWOOD® as Flooring Substrate

ERGOWOOD® is also available as a flooring substrate for elevated work platforms.

This solution offers many time and cost advantages over building a steel platform floor. In this case, the thicker ERGOWOOD® product actually becomes your structural floor with built-in ergonomic benefits. Our CNC routers enable us to pre-drill holes to match the frame design specifications provided by our customers. Available with 3/4" plywood for 24" x 24" frame spacing and 1" plywood for 36" x 36" frame spacing.

Available in any size, shape or configuration. Email sales@ergobuddy.com or call 1-800-229-1930.

TRUSTED BY LEADING COMPANIES WORLDWIDE.
